Railtechnique SARL (FR)

TFX Railtechnik GmbH (DE)

Who is RAILTECHNIEK?

The Railtechniek van Herwijnen BV Group of Companies are specialists since their foundation in 1983 in the production and installation of Overhead Conveyor components and systems. The designs, manufactures and installs only under international approved standards.

For ancillary equipment such as electric switches, pneumatic, PLC's, bearings, etc. we only use international suppliers who can meet with our standards. After the completion and sign off of the system to the customer a fully detailed manual inclusive of maintenance and operation instructions are provided. After sales, service and maintenance contracts are offered (subject to a separate contract) and when a PLC control system is used a Internet connection with 24-hour helpdesk is includes as standard.

The strong point of our group of companies is the focus on innovation, knowledge, flexibility, speed, quality and client involvement
